Star's Artbook

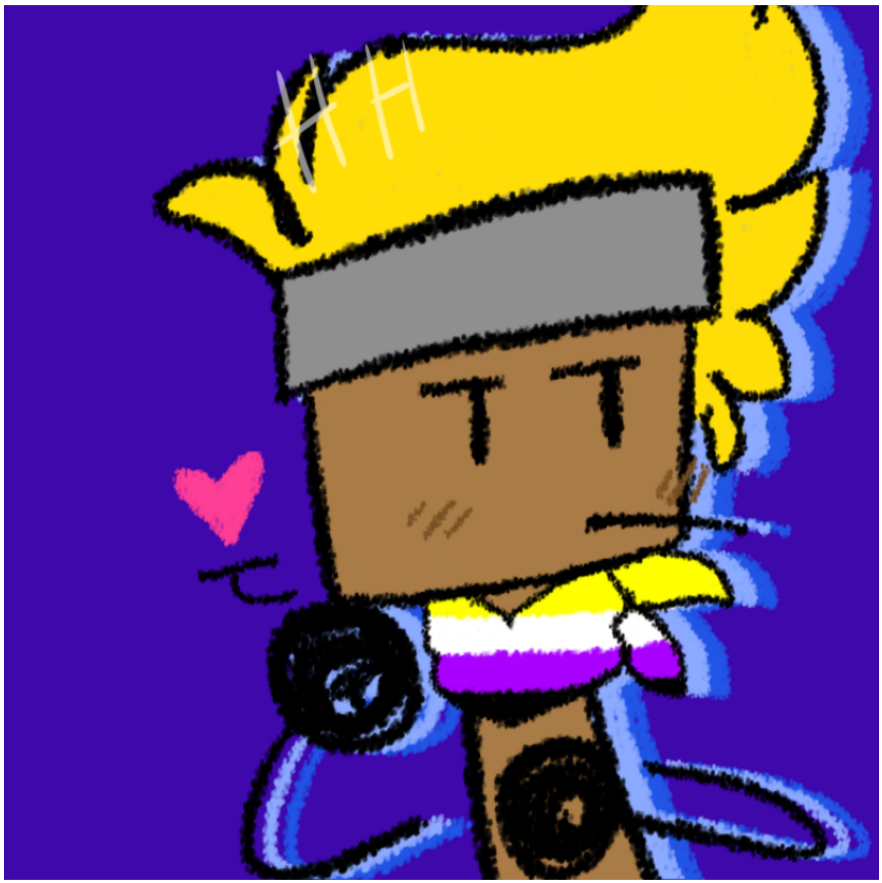
I hope you enjoy :)

Guess what

So I did have an art book a while ago buuuut I deleted that one because yea-

Anyways I made a new one-

Yay?



Paintbrush is my favorite character and I would kill for them

:0

Hmmmmmmmmmmmmmmmmmmmm

Hmmmmmmm my eyes sure do hurt

H E R

I just found out she exists but if anythin happens to her I will kill everyone and then myself

Also I just realized I'm supposed to be workin on the final parts of Island Experiment uh oh-

Wha

Can we all agree art is hard

Oh well have some Lightbrush I guess (but mostly Paintbrush because I love em-)

Don't worry! I'm almost done!
Can I go yet?

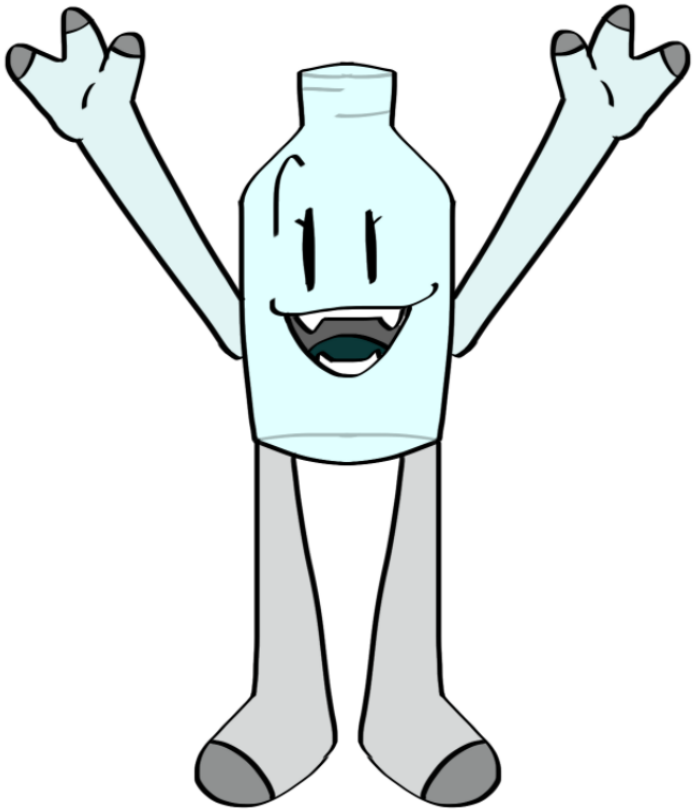
Yea

Art is hard

Hi these are all requests I had to do for Instagram but I put them here hah

Who the heck is this?



Balloon man

Got nothin to say

Get ready for my ocs next

O k

So uh I have like 10 object ocs that I am way too lazy to draw

So have like two of them-

This is CottonBall

This is CottonBall and Flass

That is all the ocs imma show for rn, maybe some other time I'll draw the rest

Chicken Boy!

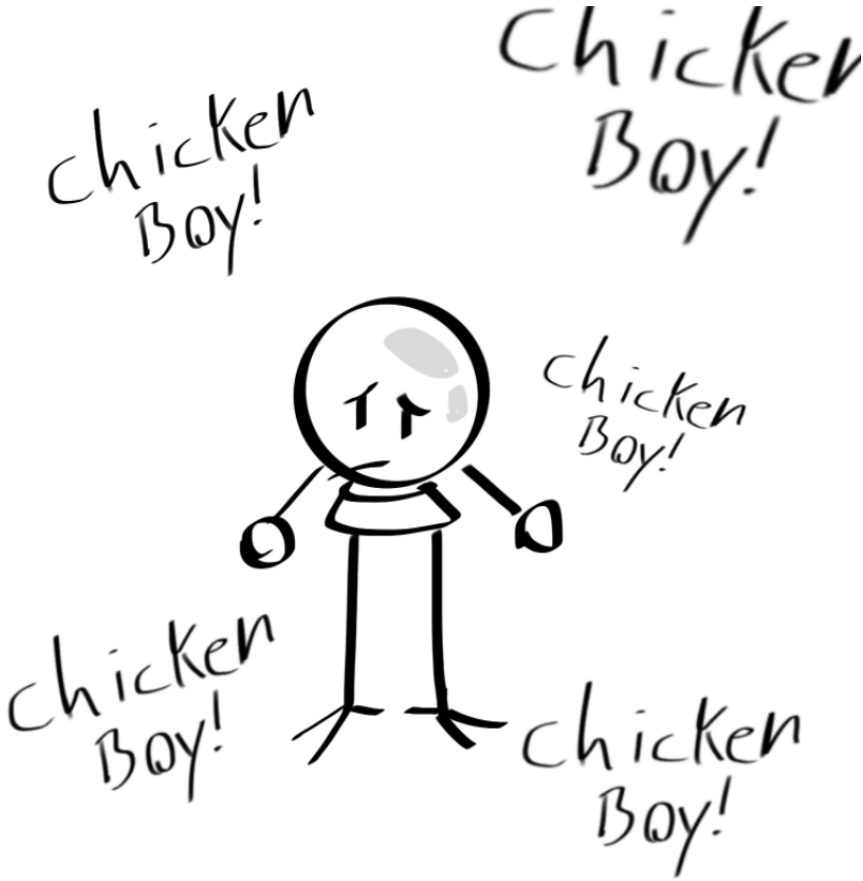
So after I posted Balloon with the stupid bird legs on other apps, some people liked it and others liked it but were quite questionin my choice of legs

So I responded with the best way I could *"Chicken Boy Chicken Boy"*

Guys look! It's chicken boy!

Just because I have bird legs, does not make me a chicken...
)

Sure, chicken boy!



Who doesn't love a chicken boy?

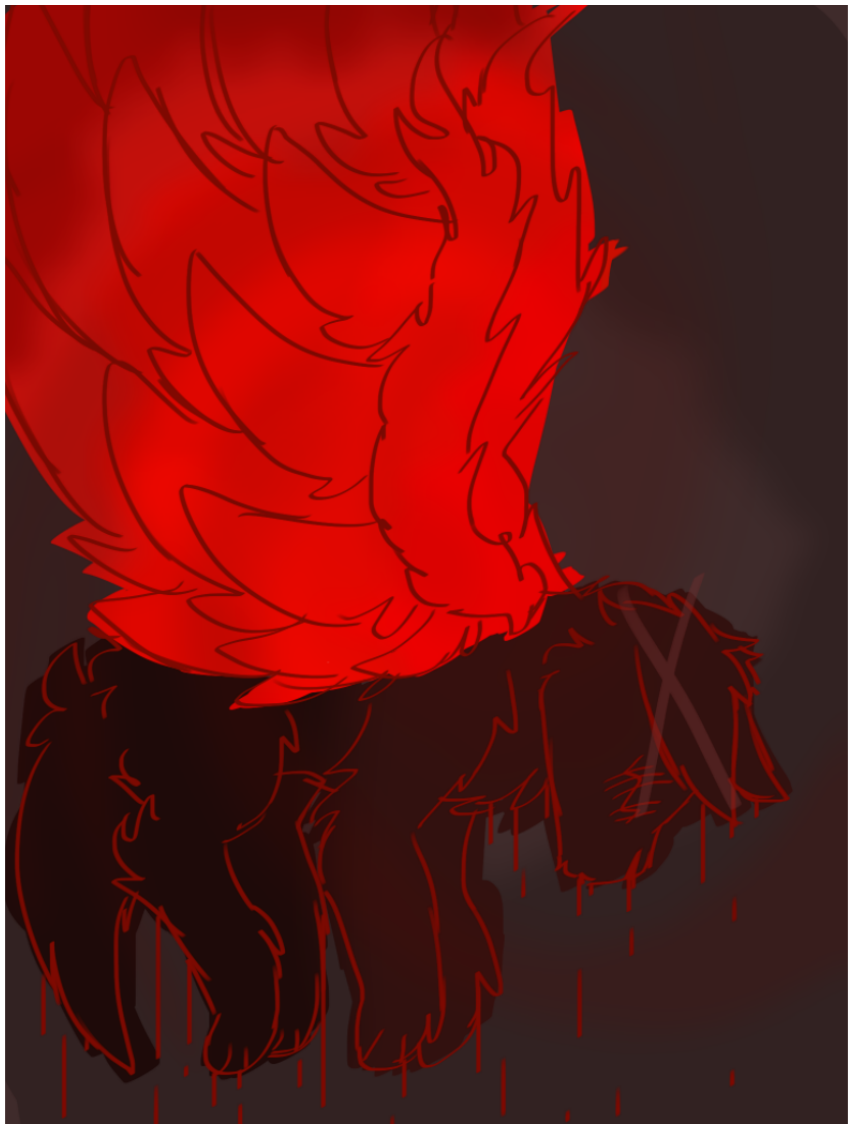
Oops-

Oops probably a blood warnin because I'm dumb and don't know when to put warnings so this is a probably-

This is vent art and uhhh I actually kinda liked it since this is the first time I didn't really think and instead just did whatever felt right-

So yea I guess edgy??

Idk eh



Aight I'll head out now-

Ulwjrlhwwkeb

I delayed Island Experiment and Dream Eater just to make this please enjoy!-

Hello :)

This isn't any art I just wanted to say hi

How you doin?

Havin a bad day? Have some pizza! No need to pay, all the money is on the pizza already! Eat your money :)

Then eat your oxygen

And then I'll give you a spiritual hug :D

Violin time

So I practiced drawin so many violins just so I can draw this and I still wanna draw more but have this for now before I make more

Headcanon - Paintbrush plays the violin in their free time

Tired

Insert stress reliever

K bye

What if

What if

Human CottonBall?

Hmmm

Unbreathe

Woejfowjdjskiwhdjsowirhkwoenfnskwkjrjfjwkwjr

Rainbow Road

Also sketch that I'll never finish

K bye :)

B l o p

Blop

Ok i guess

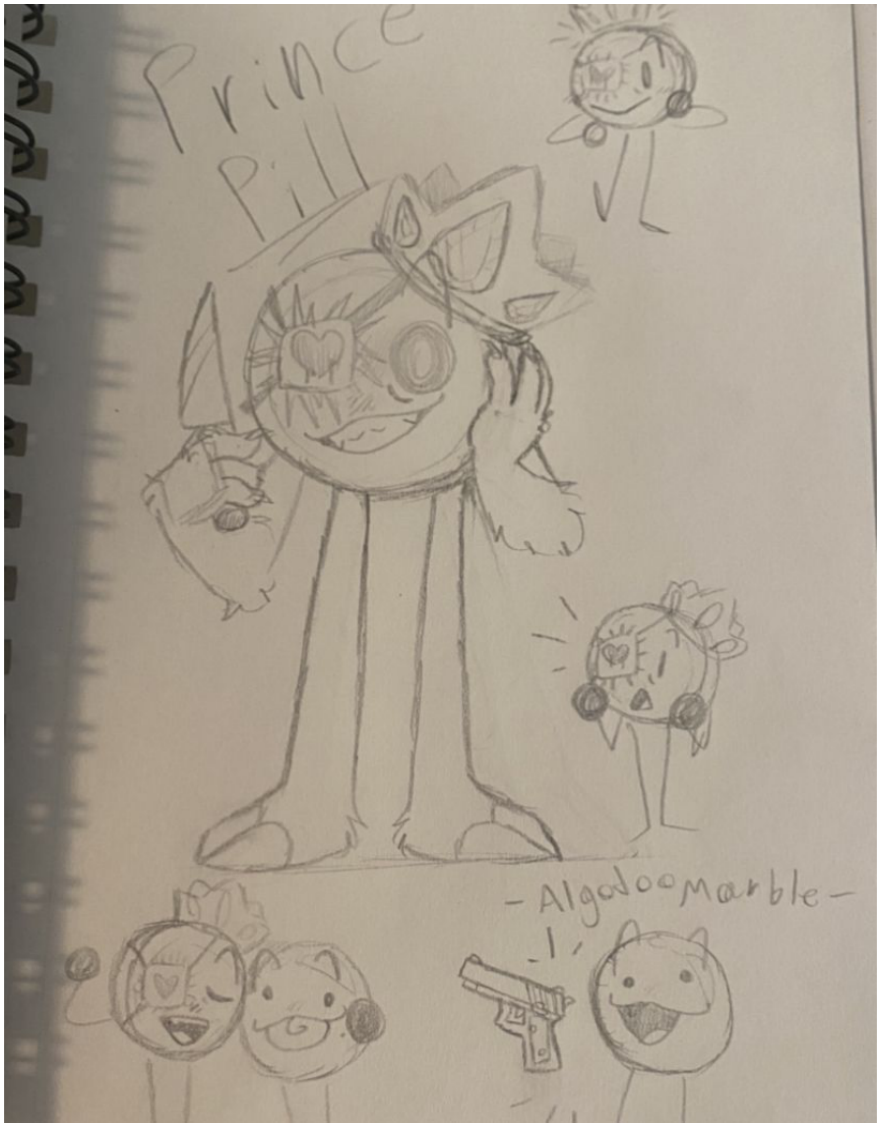
Rice and rice anyone?

Sssssssssketch book :D

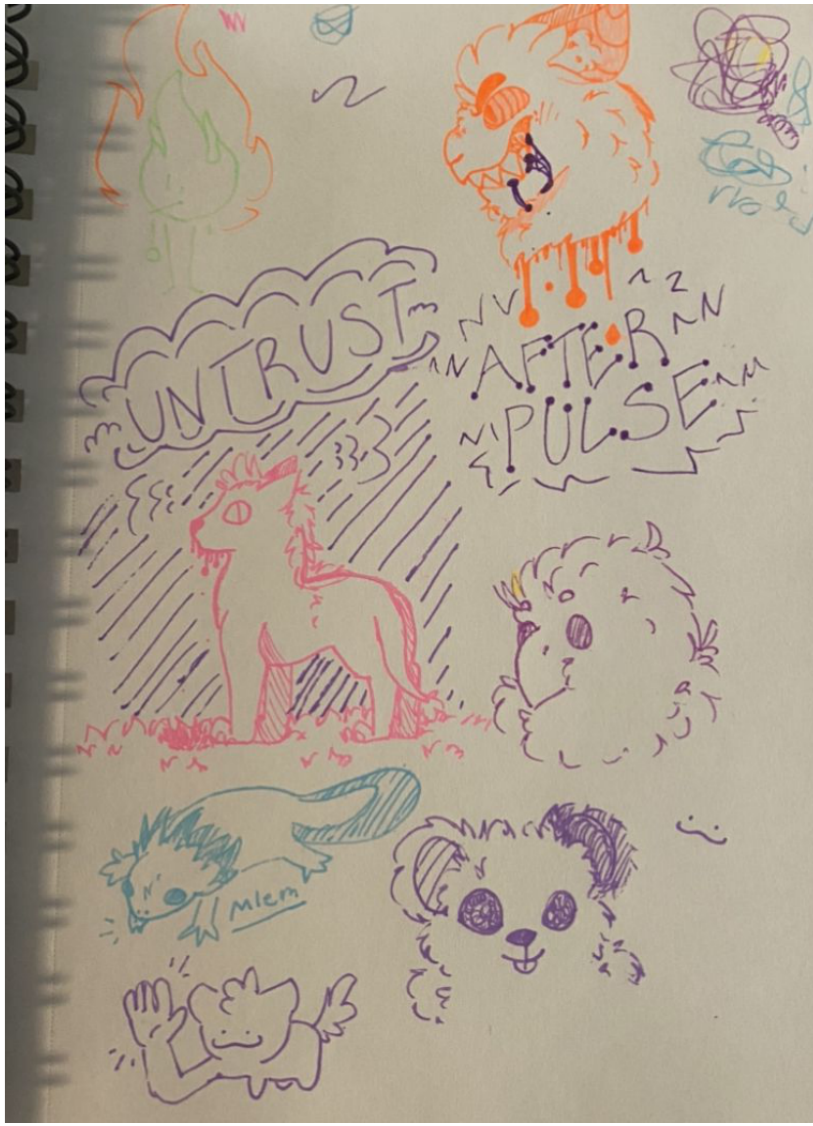
So uuhhh I got a new sketchbook and like, I did stuff, hope you enjoy!!!

Also sorry that the pictures look bad :(

FOUR :D

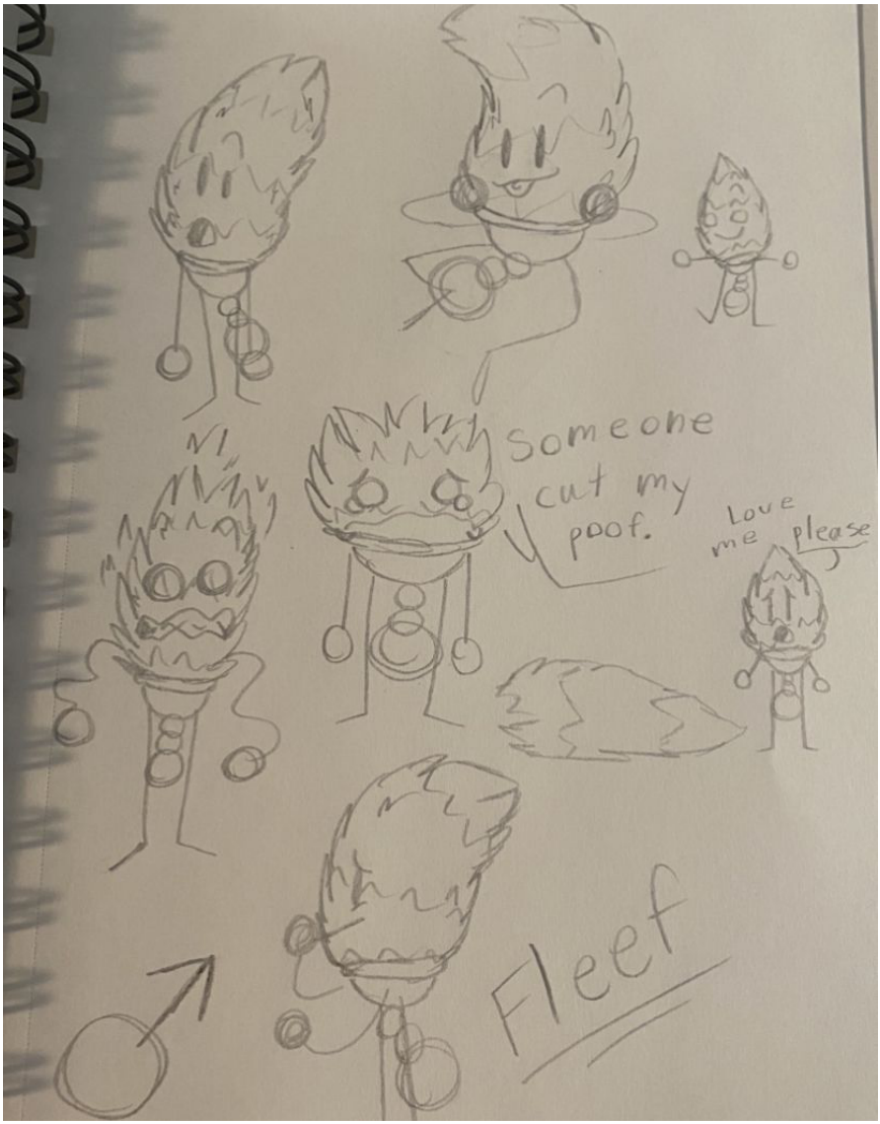


The only prince we need



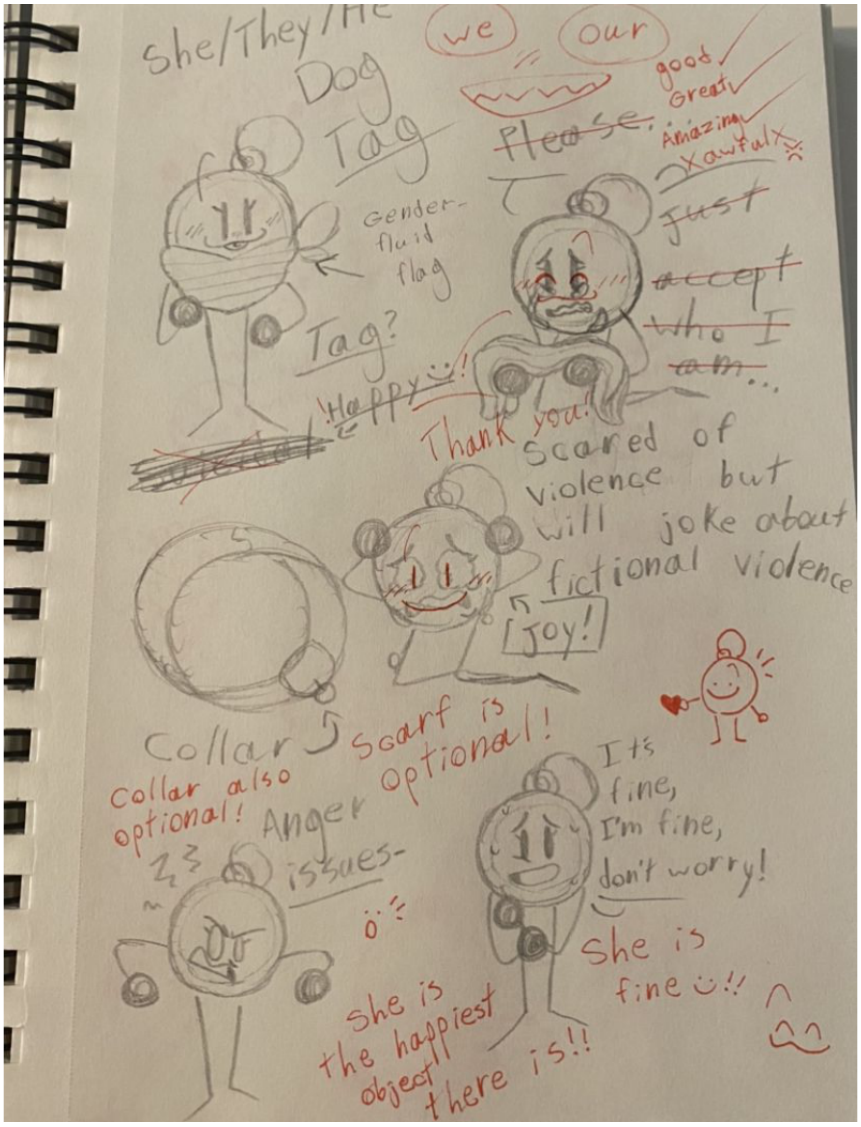
-add cool comment from author here-

Uhhh idk

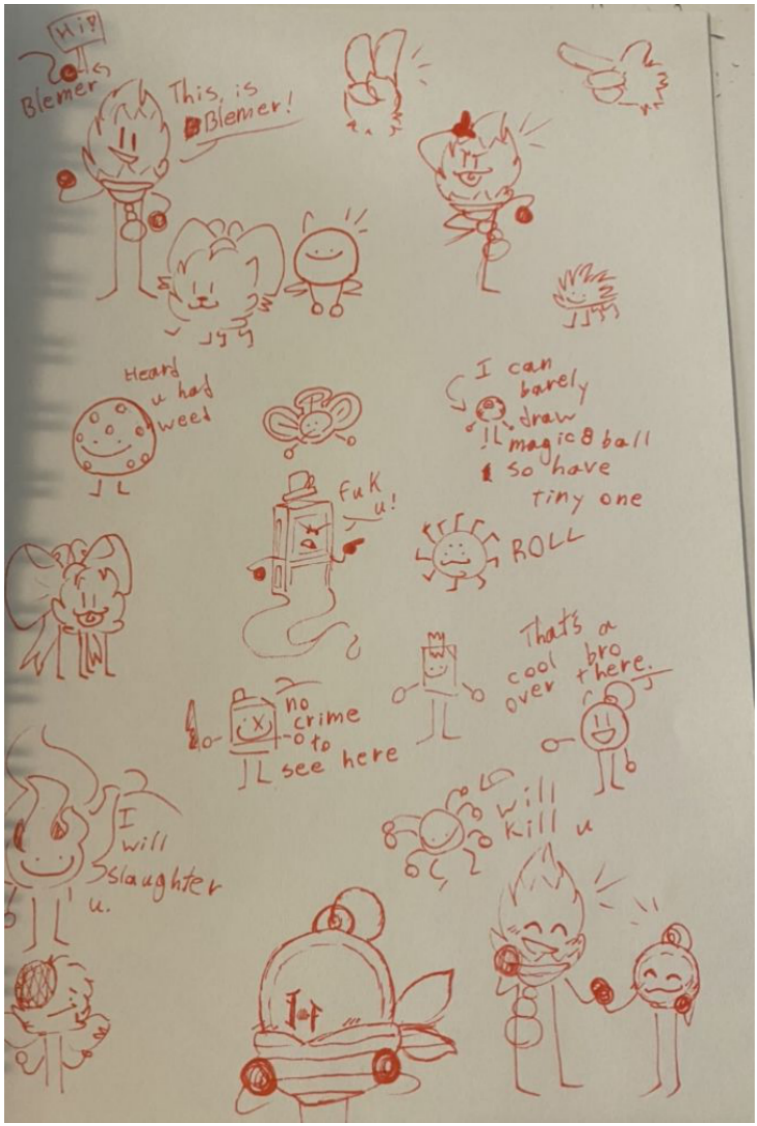


It's my new character Fleef!!! I love him UwU

My man here is on a tractor B)



This is another new character, her name is Dog Tag, or Tag for short. Ummm she represents me so yea heh-



Oh god this is so damn blurry—

Idk what to say to this one, I got carried away

And there she is again :D

These are her official colors, except the collar behind her will be changed because I hate it.

Well that's all, bye y'all!!

Just a Dog Tag

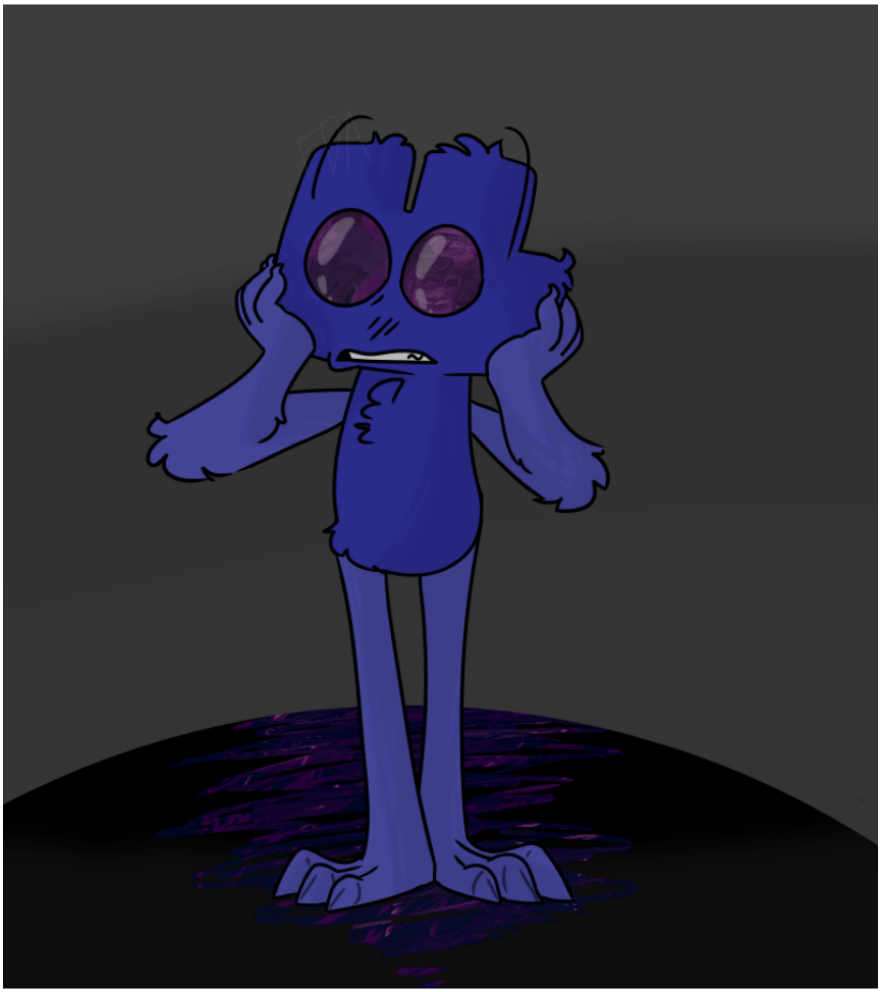
Hey so uhh

Guess who made a ref sheet-

Might make more if I'm not lazy

Alrjaojw

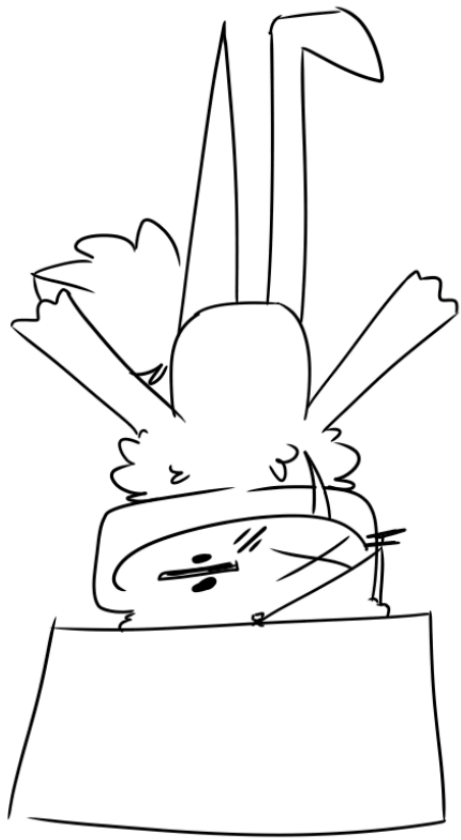
I keep running out of title ideas



I was mostly just bored so—

Also still debating whether I should keep this Foursona idea or not

I really like them but idk if other people will so imma just perish and draw them more



Help

Lost it

Oh no

Just realized I never actually showed y'all this drawin that took I believe 4 hours or somethin, I want to make anoth similar one but with limbs being cut and bleeding instead, yea-

Idk maybe I'm blind, maybe I did show it, either way here it is, I feel like one of y'all is not good with this stuff and I apologize, I'll be

putting a warning in the summary of the book so you can know that this is the type of stuff I like to draw and sometimes don't want to put warnings in front of since I like to just show my vent art and leave, for now you can yell at me for not putting a warning on this one but please know that going forward you might see more violent drawings, I don't know if my art style gives off a cute or positive thing or if it even gives off anything at all, but I like to draw this stuff and yea-

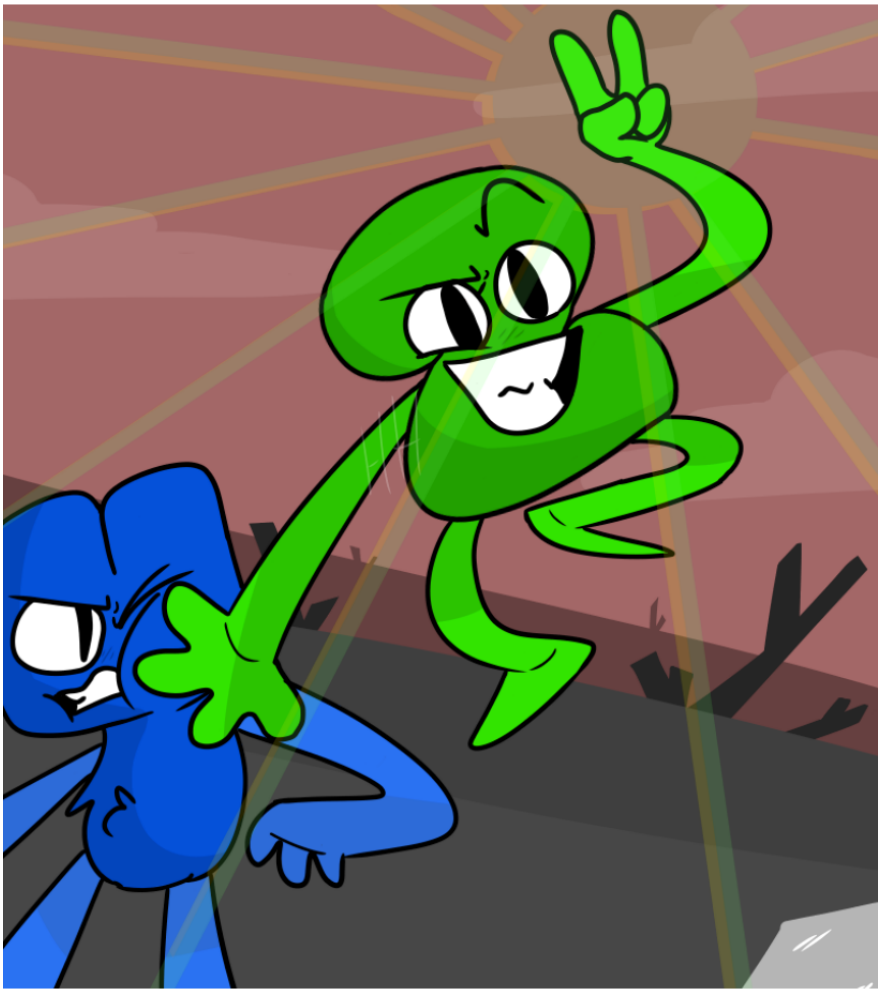
Hhhhhhhhhhhhhhhhhhhhh-

The power of 2!

So yea BFB 16 was a mix of emotions for me, though I didn't like the sudden change, I am curious about the future, if the split contestants will see each other again, if the hotel that 2 brought up was where they lived and that they lived underground and maybe we'll see what's inside the place, if they will ever go back into one show again after a certain amount of characters, if 4 will be nicer to the contestants or if they'll be sad durin the whole thing, just so many things I really wanna know but we're gonna have to wait, oh well, I'm okay with waitin, still sad that some ships and friendships got split but at least that's why we got fanfic!

Anyways I wanted to say that I really don't want this episode to break the fandom apart, I want people to just enjoy what we have, sure you might not like 2 or maybe you do, but hey, you never know what the future holds.

Also I like 2 but as a villain of the shows



Did
I hear
steal
4's show

OK OK ONE MORE THING, I feel so bad for 4, especially when they recovered Bottle and was really happy thinkin that she would stay but she just ended up leavin (this literally showed that they thought of her as a friend, also when they had a conversation in BFB 11)

Give TPOT a chance

Also Gelatin is great at beatboxin

Donate to them now

I was bored and I saw vine and I went "haha funni" so here we are

Now I go die

Woof-

And mild gore?

Idk you've just been warned for both now-

Even tho this was 100% rushed because I had to sleep at the time, I'm still mildly proud of how it came out

:)))))))))

Wlowhylcnelehfowoejfkwff hi :)

:(

"IT WAS ME"

He should've won, he knew the shortcut

Blood
warning

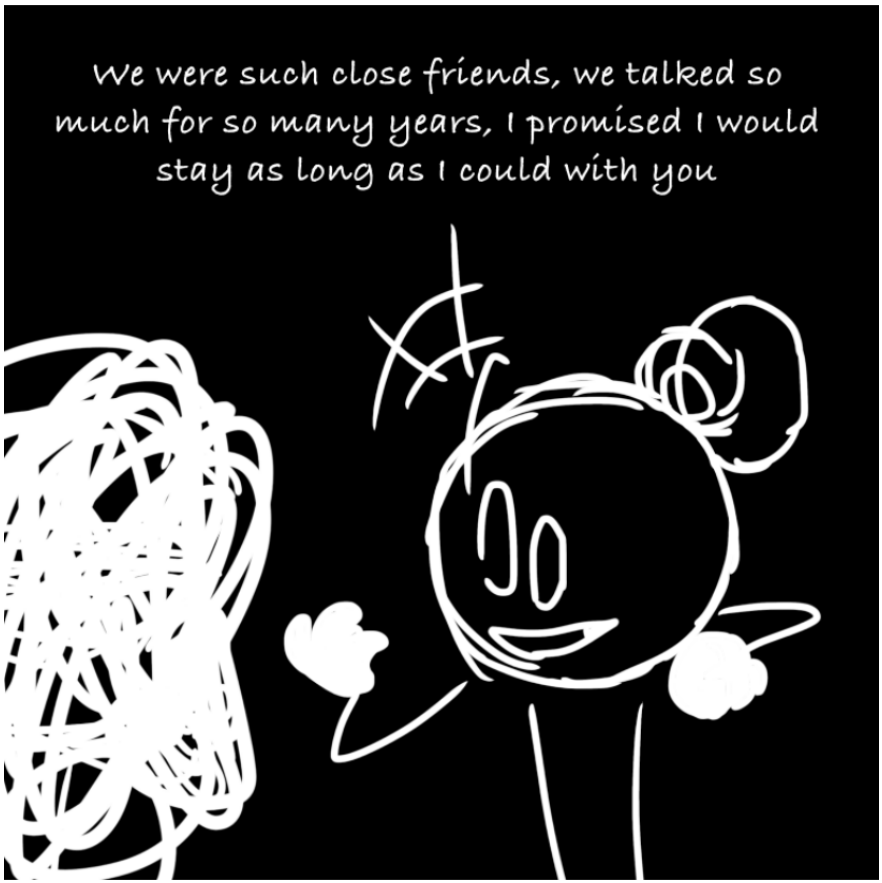
Though, it's not a lot of blood

I miss(ed) you

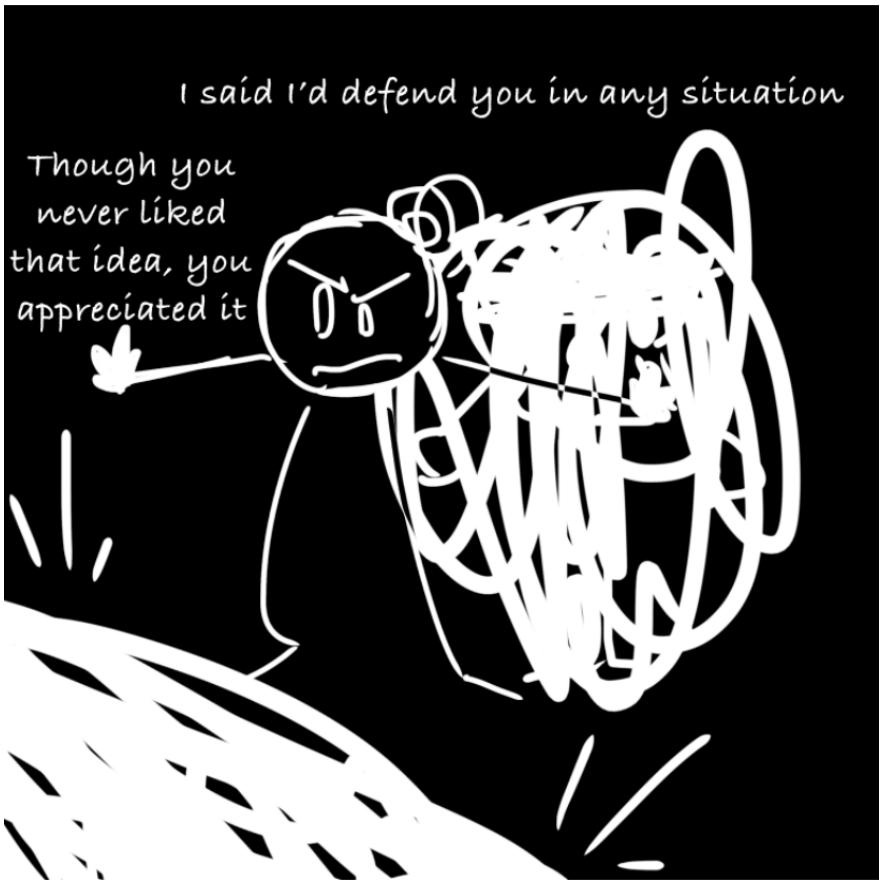
Oops vent again

But don't worry, there is 0% blood in this one

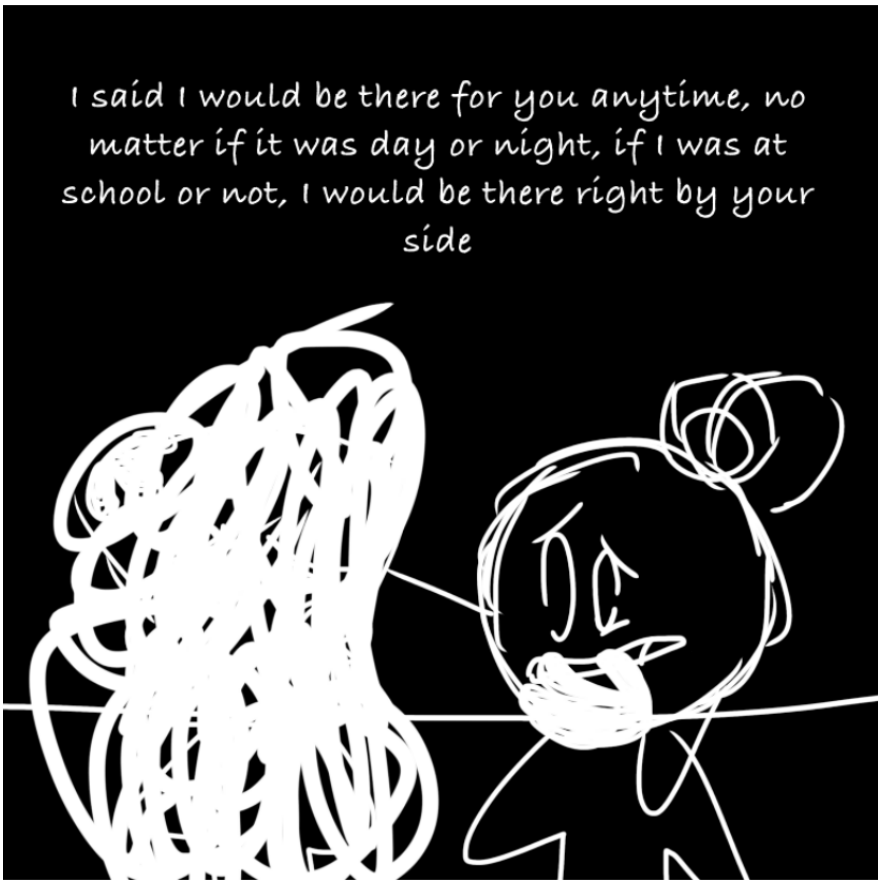
Hm



We were such close friends, we talked so much for so many years, I promised I would stay as long as I could with you



I said I'd defend you in any situation
Though you never liked that idea, you appreciated it



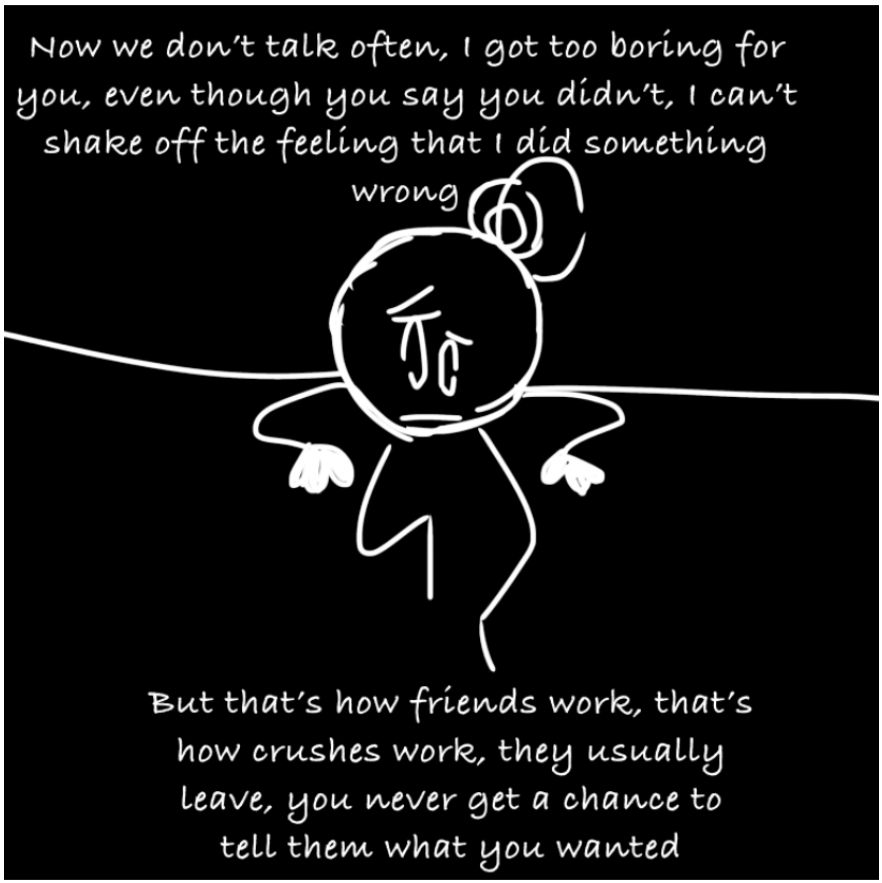
I said I would be there for you anytime, no matter if it was day or night, if I was at school or not, I would be there right by your side

I gave you so many gifts whenever I could,
even things I cherished for a while
You said you would give back to me
You never did.
But that's fine

You were there for me.

I loved you so much, I loved you more than a best friend for so many years

I loved everything about you, your voice, your personality, your face, everything
But I never told you how I felt, I was too scared



Now we don't talk often, I got too boring for you, even though you say you didn't, I can't shake off the feeling that I did something wrong
But that's how friends work, that's how crushes work, they usually leave, you never get a chance to tell them what you wanted

Actual art will be put up soon

^_^

Left Behind

Owjdowjdowjdoiwjdkdosjwkd somehow I'm still alive

Uhhhh have art

I was practicing backgrounds and stuff, so uh, yeahhhh

This took a fewww hoursss

My back hurts a lot-

Pond Night

Mutants mutants and mutants

I haven't been the best so I've been drawing some mutants lately

Mutant Tag

-Benefits-
•Can jump 20 feet into the air without usage of wings
•Metal strengthened
•Injects acid with fangs into their prey to drink the organs

•Needle like arms that can puncture stones in seconds
•Animal like ears to help them listen for prey and danger
•Is connected to everything, allowing them to find prey easily due to understanding changes in wind, changes in an objects' position and much more

-Flaws-
•Blind (the stars in their eyes are as bright as the sun, allowing them to light up their area. Sadly the brightness backfires and blinds them)
•Horn is not complete, causing headaches and making actions more uncontrollable
•Mistakes tail for another creature often
•Does not have teeth, only two fangs
•Slow runner, bones are constantly breaking and cracking as they walk, causing them to feel pain from the slightest increase in speed
•Wounds do not heal
•Is connected to everything, allowing them to feel the same pain as their prey

NOT MY CHARACTER

This is my friend's character, so yea

-Benefits-
•Can run at speeds up to 85.0 mph
•Able to dig at a quick speed and break bones of their prey

•Releases a sweet scent from both the flower and their perfume
•Able to see in the dark
•Can easily scare away other creatures due to their height

-Flaws-
•Cannot stand still for too long, bones will begin to ache
•Horn gets stuck in trees
•Has to drink an immense amount of water to keep perfume levels high
•Flower attracts insects of all kinds
•The plant continues to grow, causing them to slowly become more heavy and unable to keep themselves up
•Lacking a wing, causing the other wing to become useless and drag them down

NOT MY CHARACTER

Same person who owns the last character owns this one as well

-Benefits-
•Can see heat
•Has a tail that can easily knock out prey or puncture their prey

•Many arms to help them climb and attach to rocks
•Long fingers to be able to reach for small prey that hide in small areas
•Glows in the dark, causing prey that is attracted to light to easily be caught

-Flaws-
•Cannot run and cannot walk properly, they are slow due to the different legs
•Tail spikes sometimes hit them on the head, causing severe wounds
•Crystals forcefully poke through their strong skin

Want to see a specific mutant and their benefits and flaws?
You can request any object character, I'll only do them though if I am interested in the character or have an idea!

I want to draw mutants to make me feel better because this year has not been fun
Heck even my birthday yesterday was awful tbh :)

Thank you to those who wished me happy birthday though! I love you all!! :D

look i did something

This was a DTIYS thing I have decided to enter on Instagram, uhhh thats it

No one:

My hand: "how much-"

Me: " y e s "

Dancing!

Aaa

Haha when I can't draw characters dancing or even interacting :)

AFRAN IS THE ONLY ONE I OWN, THE OTHER BELONGS TO A PAL

:Afran: The one on the right-

Dead

That's it

I sold my tiny soul for this

Please spare me

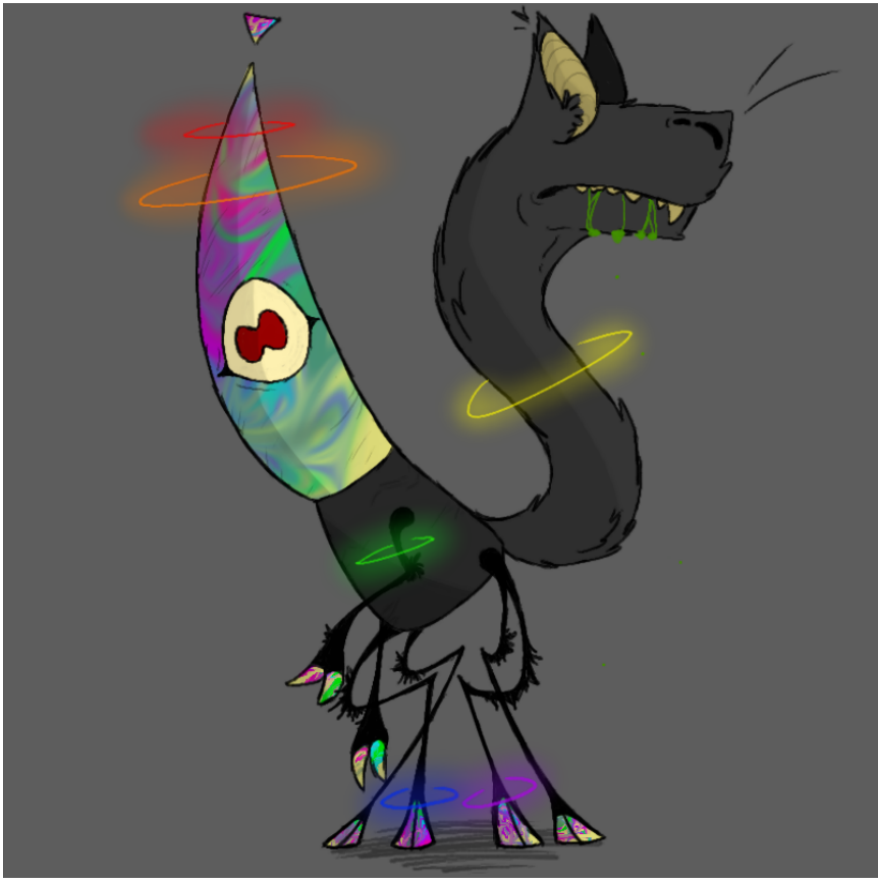
Eyes hurt :(

With dumb filter

Without dumb filter but it's still dumb

This was a DTIYS on Instagram, ok bye I go die now

Mutant Request



Requested Mutant for Moodq-

-Benefits-

•Has a tail that substitutes for three senses this mutant lacks in the face (hearing, smell, and taste)
•Attracts different creatures with specific colored glowing rings
•Can swim at speeds up to 105.7 mph
•Claws hook onto wood and the flesh of it's prey
•The color in the multicolored parts, constantly move in a slow liquid like motion (usually this calms intelligent prey)

-Flaws-

•Due to the error of both eyes becoming one, this mutant has difficulty seeing and bumps into things constantly due to its broken view
•Cannot walk correctly, legs bump into each other causing this mutant to fall quite a lot (better in water)
•Due to these flaws above, the tail is extremely aggressive, this causes it to attack anything that it senses moving in front of it, often times water or a small leaf
•Gets claws stuck in things

-How to get away from this mutant-

•Avoid their tail at all cost, it's senses are boosted but it senses only work if the prey is in front of it
•Go past it's blind spot (The side of their face that lacks an eye)
•Avoid looking at the rings and the multicolored parts, will most likely distract and cause you to walk towards them instead of away

-If seen by this mutant-

•Run as fast as you can, this mutant cannot catch up but it has an immense amount of energy so try not to get tired too quickly
•AVOID ANY BODY OF WATER

Avoid these instructions and death will be right at the corner

I hope you like the mutant!!!! :D

You can change anything you'd like! It's benefits, it's flaws, or design, it's all up to you! :)

Roll

I really need to work on my fanfics, I'm sorry I'm so slow on them

Have something that took me a whole day to make

At first it was a vent but since it took a while it uH just became something I wanted to finish

Quite proud

Redraw

Soooooooo art, like any artist I have old art, so I redraw some of them

This is the first drawing in this art book

I used to really like it even though it took me like 11 minutes or some shit

Either way I redrew it because

the following art shows is just silly stuff i drew of some other alters.
yea i am a system, and no it is not DID it is OSDD. h th o this is a self

diagnose because i cannot actually ask to get what i need irl, i still did research for quite some time and even now still doing research but i am sure these individuals are real and my experiences are as well.

anyways look at them.

What's on your mind?

i changed his eyes

practice (first time using my sketchpad tablet and medibang, yes i have been drawing with my finger this whole time)

more practice

these practices are from yesterday

time to disappear for another century

talk to me if you'd like i'm quite open to chitchat even if i'm not really active

yea

but i've been messaged so many times by people wanting me to read their books, i don't need that.

hi art here

hi again

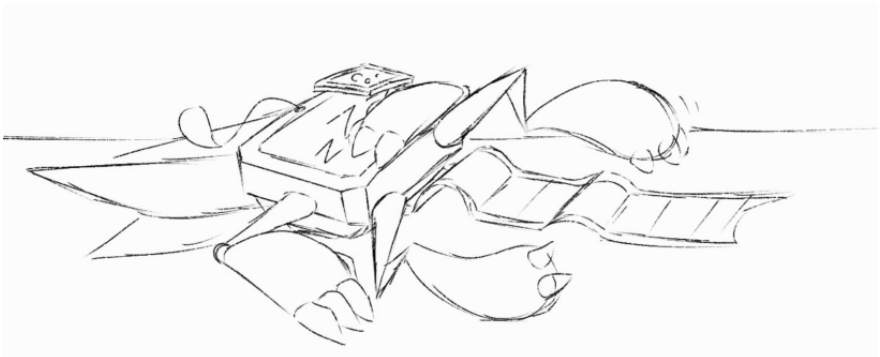
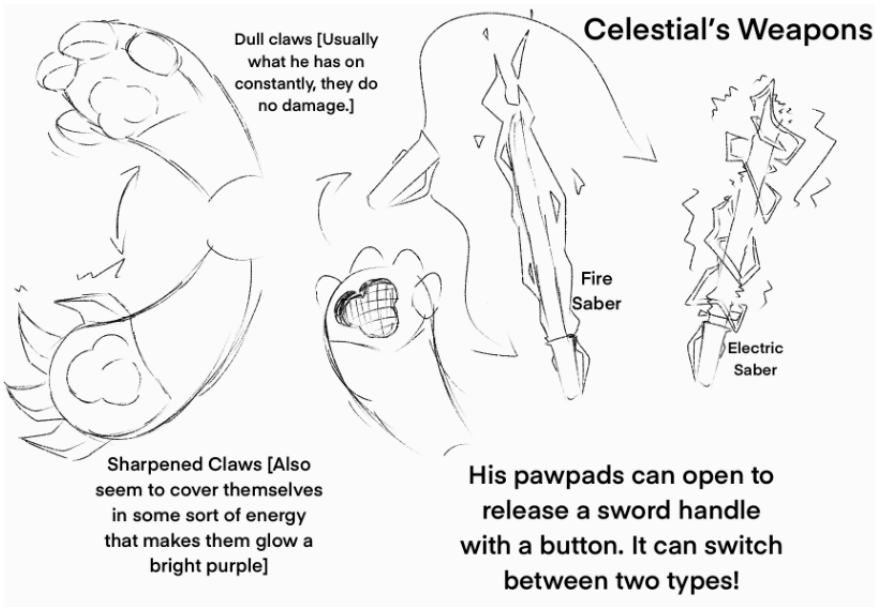
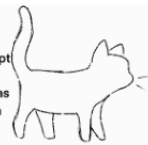
Celestial
[Subject-85590]
He/it/they





Celestial's Weapons
Dull claws [Usually what he has on constantly, they do no damage.]
Fire Saber
Electric Saber
Sharpened Claws [Also seem to cover themselves in some sort of energy that makes them glow a bright purple]
His pawpads can open to release a sword handle with a button. It can switch between two types!

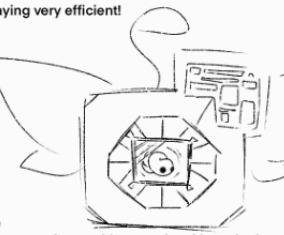
All Saints (Soul/Whole being transferred into an AI robot) can vary in appearance. Their entire function is to create the concept of immortality. Keeping not only the consciousness but also their entire being as a whole. Meaning they are still very much alive, simply transferred into a new body that is made to never fail.



Celestial is the first successful Saint. Though uncontrollable and rather unreasonable at times, he shows clear signs of poor mental health due to his past and current conditions. Showing us that the soul seems to directly bring in not only memories, but also emotions that the artificial brain can very much express and calculate. Revealing to us that the two work together to properly create the personality and identity of the person.

Why did we choose a cat for his appearance? Felines seem to not only be close to perfect predators, but also seem to be greatly loved by objects. Which is why his appearance is supposed to be approachable while staying very efficient!

Touch sensors can be found on basically every part of the body. These sensors also create the feeling of pain if possible damage is detected. This is to ensure no damage goes unnoticed.



The soul is contained in a device that is contained once more inside another device that is quite unbreakable unless taken apart piece by piece with a special tool

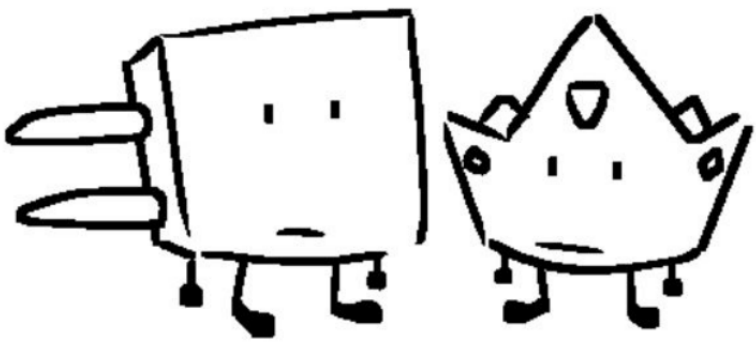
Celestial's ears function as needed. He can hear from very far, as well as all around, creating an idea of everything within a radius. Though he seems to struggle to hear through doors. Which is strange because he should be able to and we have yet to find any damage in his ears. Maybe he's just stubborn.. The antenna in connected to his head is used to be able to sense other AIs, though he refuses to also use this.. He can also run and walk on all fours.. but once again. He refuses to do this even though it makes his speed even faster..

His ears and tail at least express the same body language that cats use. So pay attention to that when working with him! Though, he also has a small screen that expresses all his emotions and thought into simple symbols. It has also been proven to express his intrusive and even impulsive thoughts. He also has the ability to purr, which in cats has been proven to give comfort and even show signs of being able to heal the sick as its frequency is at a perfect level. Though this only happens when they are happy and comfortable. But Celestial is an angry. Very angry object..

it is pride month celestial. you know what that means
huh
what
do you want us to like go to a
gay planet
what
...

A big question we seem to be asked often is "are these bodies waterproof? are they vulnerable to extreme temperatures?" and we really hope they shut up. But yes, these bodies are completely waterproof ! We once dropped our only subject into a body of water. We only wanted to test if they were waterproof but they also showed us that they know how to swim, saying they took swimming classes when they were younger ! He was even in a swimming club in high school ! But that's not important, what is important is that no matter what amount of water, nothing gets damaged in any way, meaning Saints can live at the bottom of the ocean if they wanted! (They are also not affected by extreme pressure)

We have also used him to test temperatures. He claims that his sensors still detect temperatures and give him a feeling of pain when the temperatures are extreme. Yet, no damage seems to be actually done. Seems the sensors detect temperatures that are harmful for a normal body, but outside of that, these Saint bodies seem to not be affected by extreme temperatures. Yes you can throw them into the vacuum of space and they'll basically float forever and ever but we do not recommend that. The material used to make Saint bodies are very VERY expensive and extremely scarce! Due to that, we will be scrapping this Saint soon so we may use the body for someone who actually matters.



I'll be
right there!!

random no context character lore below !

Hey [redacted] Are you ready for our trip yet?
I'm not sure.. Maybe we shouldn't go..
The suns have been looking weird..
Huh..
Yeah they have been looking strange..
Maybe it's just the atmosphere, you know how COSMIC likes to test stuff like that !!
I guess.. Maybe they're just testing some new stuff..
Yeah.. Maybe it's just me..
That's alright dude ! Besides, they would tell us if something serious was happening!
So let's go check out the new planet they found !!

Stay safe, and stay together !
We will, mom, no worries !
So is there any information about this planet?
I have no idea, I would rather wait and see myself what it has to offer!
-shut-
Hurry ! Before we miss our spot !!
Ooo get over here dude!! This building's huge !
Ooo.. So this is the teleporter? Looks.. New.
Heck yeah ! And you wanted to miss this chance!!

Now let's go get our suits!!
We'll make history here ! I can't wait for us to be part of the first group to use this thing !!
Wait-
Heh.. Yeah !
These suits suck. They're far from comfortable..
Well, they are prototypes. They're only recently trying out the tech that makes custom suits at fast speeds anyways.
I know I know.. But they could be at least less ugly..
[redacted] Come check this out !! There's wildlife!!
Probably cool as hell!
Oh! How pretty !! I wonder what the food web is like on this planet !
This beats staying inside and messing with tech, right? So much out here in our universe that is still being discovered!! Don't you want to see it all?
I do.. I want to see it all..

hey guys ! this part is gonna be about the stories i made !

if you don't care, ignore this and leave, that's okay ! :]

anyways since i get so many comments telling me to continue the stories or to give a general summary of the ending and what it was about, i'd like to clear up some stuff. i am barely on here, only coming on to put up art, though i still see every comment because i'm a curious person and like to just look at things.

i currently do not plan to continue dream eater and defective, i currently do not care about those stories. also those stories are now considered old to me, what i like has completely changed, and currently i'm not into fanfics anymore, at least bfb/tpot and ii ones. the new season and the split caused me to get really bored of both of them which simply just happens. if you enjoy my stories then that's great ! but i will not continue nor plan to make more, it takes a lot of energy and dedication to make them, i do not have that at the moment.

so please stop asking me, and the ending/summary thing im sorry but i can't do them. i both kinda don't want to and also don't remember what i had planned, i never wrote anything down, it was just a go with the flow with every story really, whatever i had at the time would build what comes next.

i do know that dream eater was gonna have a happy ending, defective was gonna have a neutral ending.

hope that clears things up !

Tag
No prns/It
Colors for tail are not exact, just looks like space.
Preferred form. Though its preferred form can change.
It can modify or add whatever it wants to its form!
It can also change into any object it wants to!
Its 'pure' form is a goop with space origins. It moves slowly and is only capable of making gurgling sounds in such form. Tag immensely avoids this form at all costs. Though, when it doesn't feel like itself, it will unwillingly shift into this.
Colors are not exact.
Acts as blood in solid forms.
Goop sits inside solid forms, creating an outer barrier made of the same material of the current object.
